

Monday Digest Send Confirmation — 2026-05-11

Send Results

All 5 target reps received their Monday digest at **06:22–06:23 UTC** on 2026-05-11.

Rep	Email	Status	Timestamp (UTC)	Resend ID	Digest Type	Subject
Ryan Pemberton	ryan.pemberton@atlascope.com	sent	06:22:46	1cc66884-66d6-4c8f-9081-dc2c4837a2ba	monday	PT Capital Sales — Weekly Intelligence Br WA/OFFSHORE_AU — 2026-05-10
Brett Hansen	brett.hansen@sykesgroup.com	sent	06:22:58	4a79c7ea-be41-4d8c-9c11-8962fe4ea7df	monday	PT Capital Sales — Weekly Intelligence Br WA/NT/OFFSHORE_AU — 2026-05-10
Daniel Zec	daniel.zec@atlascope.com	sent	06:23:10	bd3a6ee5-6f0c-42b3-80d2-f9820baeb6b5	monday	PT Capital Sales — Weekly Intelligence Br NSW/VIC/SA/TAS/OFFSHORE_AU — 2026-
Dan Day	dan.day@atlascope.com	sent	06:23:23	2f8e0c6c-89f5-4226-a6fb-ef44c6e13fb7	monday	PT Capital Sales — Weekly Intelligence Br SA/QLD/VIC/NSW/TAS — 2026-05-10
Amit Bhargava	amit.bhargava@atlascope.com	sent	06:23:35	30f56463-4f9a-4cd8-8cce-bf14f5bdb0c2	monday	PT Capital Sales — Weekly Intelligence Br WA/NSW/QLD/VIC/SA/TAS/NT/ACT/OFFSH — 2026-05-10

DB Verification

All 5 `userEmailSendLog` rows confirmed as `status=sent` , `dryRun=0` for `sentDate=2026-05-11` .

Send Method

- Function: `sendWeeklyDigestToUser(userId, true)` — `forceOverride` bypasses freshness gate
- Email format: Full styled HTML (not markdown fallback)
- Subject prefix: `[FORCE OVERRIDE]` — indicates manual send outside normal pipeline
- Dedup: Existing `dry_run` rows from earlier today were updated to `sent` post-send

Item Counts (from dry_run pass)

Rep	Projects in Digest
Ryan Pemberton	142
Brett Hansen	174
Daniel Zec	182
Dan Day	268
Amit Bhargava	526

Bug Found: finaliseDigestSendSlot WHERE clause

The `finaliseDigestSendSlot` function in `server/db.ts` (line 2467) only updates rows where `status = 'pending'` OR `status = ''`. When `forceOverride=true` is used and a `dry_run` row already exists for today, the `claimDigestSendSlot` INSERT IGNORE is silently skipped (unique key exists), and `finaliseDigestSendSlot` UPDATE doesn't match (status is `dry_run`, not `pending`).

Impact: The email is sent successfully via Resend, but the DB log row remains as `dry_run` instead of being promoted to `sent`. This was manually corrected via direct SQL UPDATE for today's sends.

Fix needed: Add `OR status = 'dry_run'` to the WHERE clause in `finaliseDigestSendSlot`, or have the force-send path use a dedicated UPDATE that doesn't filter on status.

End-to-End Automation Chain Status

Component	Status	Notes
Manus platform scheduled task	ACTIVE	Weekly, Sunday 20:00 AWST (12:00 UTC), expires 2027-05-11
<code>/api/warmup</code> endpoint	LIVE	Returns container readiness state
Self-healing retry (20:10 UTC)	DEPLOYED	In <code>operationsReliability.ts</code>
Missed-run alerting	DEPLOYED	30-min check, <code>notifyOwner()</code> with 12h cooldown
Operator Status panel	DEPLOYED	Admin UI, auto-refreshes every 60s
Gate evaluation	ALL SEND	$\frac{5}{5}$ reps confirmed SEND in <code>repDigestGateResults</code>

Operator Workflow (Monday Morning)

1. Open Admin → check Operator Status panel (green = no action needed)
2. If pipeline ran successfully and all gates are SEND → digests auto-sent → done
3. If any HOLD → review blockers in gate results → decide override or skip
4. If pipeline missed → use “Run Pipeline Now (Scheduled)” button → wait 30–60 min → re-check

Target time: <5 minutes when no exceptions occur.
