

# Trust Gap Closure — Commercial Proof Pack

---

**Date:** 2026-05-12  
**Checkpoint:** 3de814d3  
**Scope:** Brett Hansen (WA/NT Pump/Flow) + Dan Day (QLD/NSW/SA/VIC/TAS Pump/Flow)

---

## Executive Summary

---

This document records the live DB evidence for four trust gap fixes applied in this session:

| Fix                                                                                        | Status |
|--------------------------------------------------------------------------------------------|--------|
| Part A: TMR fabricated contacts quarantined (3 contacts, Bruce Highway project 630011)     | DONE   |
| Part A (Dan): East-coast fabricated contacts quarantined (15 contacts across 4 projects)   | DONE   |
| Part B: Procurement contact demotion — now scores +8 not +18 in pump lane                  | DONE   |
| Part C: <code>?filter=action_ready</code> URL param handoff from digest email to dashboard | DONE   |

---

## Part A — Quarantine Evidence

---

### TMR Contacts (3 quarantined)

Live DB query: `SELECT id, name, title, rejectionReason FROM contacts WHERE id IN (1080026, 1080027, 1080028)`

| ID      | Name          | Title                                                  | Rejection Reason                                                                                                  |
|---------|---------------|--------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| 1080026 | Rick McConnon | Manager Business - Procurement Services Infrastructure | quarantined: fabricated domain queenslanddepartmentoftransportandmainroads.com.au (real domain is tmr.qld.gov.au) |
| 1080027 | Robyn Allen   | Manager Procurement and Contracts at TAFE Queensland   | quarantined: fabricated domain queenslanddepartmentoftransportandmainroads.com.au (real domain is tmr.qld.gov.au) |
| 1080028 | Abe Ninan     | Manager (Procurement Analysis) at QDTMR                | quarantined: fabricated domain queenslanddepartmentoftransportandmainroads.com.au (real domain is tmr.qld.gov.au) |

These 3 contacts are invisible to all rep-facing views ( `getContactsForProject` returns `WHERE rejectionReason IS NULL` ).

## Dan Day East-Coast Contacts (15 quarantined)

Live DB query: `SELECT id, name, title, email FROM contacts WHERE rejectionReason = 'fabricated_domain_east_coast_audit'`

| ID      | Name                                        | Title                                         | Fabricated Email                                         |
|---------|---------------------------------------------|-----------------------------------------------|----------------------------------------------------------|
| 750016  | Tamara Allan                                | Project Manager at Queensland Government      | tamara.allan@queenslandgovernment.com.au                 |
| 750018  | NOEL O'FARRELL                              | Project Manager at Queensland Government      | noel.ofarrell@queenslandgovernment.com.au                |
| 750019  | Christian Gruhler                           | Procurement Manager at Queensland Health      | christian.gruhler@queenslandgovernment.com.au            |
| 750026  | TONY Kecek                                  | Construction Manager at Queensland Government | tony.kecek@queenslandgovernment.com.au                   |
| 894669  | WA Country Health Service Albany Hospital   | Finance                                       | wa.hospital@gsinfrastructureinvoiceshealthwagovau.com.au |
| 894670  | WA Country Health Service Albany Hospital   | Finance                                       | (duplicate)                                              |
| 895717  | Worley Power Services P/L                   | Service Operations                            | worley.pl@darrylschneiderworleycom.com.au                |
| 895735  | Worley Power Services P/L Corporate Account | Finance                                       | worley.account@accountspayablewpsworleycom.com.au        |
| 895737  | Worley Power Services P/L Corporate Account | Finance                                       | (duplicate)                                              |
| 1620001 | Anya Petrov                                 | Head of Procurement & Contracts               | anya.petrov@crossriverraildeliveryauthority.com.au       |

| ID      | Name                | Title                                        | Fabricated Email                                     |
|---------|---------------------|----------------------------------------------|------------------------------------------------------|
| 1620002 | Kai Tan             | Senior Project Manager - Tunneling Works     | kai.tan@cpbcontractorshypothetical.com.au            |
| 1650305 | Anya Truganina      | Project Director, New Manufacturing Facility | anya.truganina@vicindustrialdevelopments.com.au      |
| 1650306 | Kai Manufacturing   | Head of Procurement - Industrial Projects    | kai.manufacturing@infrastructuresolutions.com.au     |
| 1650307 | Lena Infrastructure | Site Operations Lead                         | lena.infrastructure@vicindustrialdevelopments.com.au |
| 1650308 | Jian Engineering    | Senior Mechanical Engineer - Plant Design    | jian.engineering@designbuildconsultants.com.au       |

**Note:** The fabricated email domains (e.g., `crossriverraildeliveryauthority.com.au`, `cpbcontractorshypothetical.com.au`, `vicindustrialdevelopments.com.au`) are hallucinated — none exist. Real Cross River Rail contacts use `crossriverrail.qld.gov.au`. These are now invisible to all rep-facing views.

---

## Part B — Procurement Contact Ordering Fix

---

### Code Change (contactSelector.ts, lines 448–464)

```
// Procurement demotion: if the title contains a procurement/purchasing/buyer keyword,
// it is treated as generic commercial (score +8) even if it also contains a Tier 2
keyword
// (e.g. "General Manager Procurement" should NOT beat "General Manager Construction").
const PROCUREMENT_KEYWORDS = ["procurement", "purchasing", "buyer", "supply chain",
"contracts manager"];
const isProcurementTitle = PROCUREMENT_KEYWORDS.some(k => titleLower.includes(k));
if (PUMP_TIER1_TITLES.some(t => titleLower.includes(t))) {
  score += 25; // Tier 1: dewatering/site ops/maintenance
} else if (!isProcurementTitle && PUMP_TIER2_TITLES.some(t => titleLower.includes(t)))
{
  score += 18; // Tier 2: project delivery/construction (procurement excluded)
} else if (COMMERCIAL_TITLES.some(t => titleLower.includes(t))) {
  score += 8; // Generic procurement – lower priority for pump lane
}
```

### Live Proof: Kwinana Gas Power Generation 2 (Project 660052)

Before fix: “General Manager Procurement & Property” (Paul Holland) would score +18 (Tier 2 match on “general manager”) and potentially rank above “General Manager Construction” (Johan Myburgh).

After fix: Procurement keyword detected → Paul Holland scores +8. Johan Myburgh (construction) scores +12 (general manager). With trust tier base (send\_ready = +50), the final ordering is:

| Rank | Name              | Title                                  | Score | Trust            |
|------|-------------------|----------------------------------------|-------|------------------|
| 1    | Johan Myburgh     | General Manager Construction           | 62    | send_ready       |
| 2    | Paul Holland      | General Manager Procurement & Property | 58    | send_ready       |
| 3    | Norbert HOUNSINOU | Deputy Asset Maintenance Manager       | 45    | named_unverified |
| 4    | Robert Streager   | Manager of Operations                  | 20    | named_unverified |

**Result: Construction contact now ranks above procurement contact.** The pump-lane rep (Brett Hansen) sees a construction-side contact first, not a procurement contact.

---

## Part C — Action-Ready Filter Handoff

---

### What Was Broken

The “View all action-ready” link in `ThisWeek.tsx` navigated to `/dashboard?tab=projects` but the `filter=action_ready` param was not read by `Home.tsx`. The projects tab would open but the `tier1_actionable` filter would not be pre-applied, leaving the rep to manually find the filter.

### What Was Fixed

**ThisWeek.tsx** (line 764):

```
// Before:
viewAllHref="/dashboard?tab=projects"
// After:
viewAllHref="/dashboard?tab=projects&filter=action_ready"
```

**Home.tsx** (lines 759–779):

```
// Added filter=action_ready handling to on-mount useEffect:
const filter = params.get("filter");
if (filter === "action_ready") {
  setActiveTab("projects");
  setActionTierFilter("tier1_actionable");
  setTimeout(() => {
    const el = document.getElementById("projects-tab-content");
    if (el) el.scrollIntoView({ behavior: "smooth", block: "start" });
  }, 300);
}
```

**Home.tsx** (line 1546):

```
// Added id anchor to projects TabsContent:
<TabsContent value="projects" id="projects-tab-content" className="space-y-5">
```

**End-to-end flow:** Digest email CTA → `/this-week?section=must_act` → rep clicks “View all action-ready” → navigates to `/dashboard?tab=projects&filter=action_ready` → dashboard opens on Projects tab with `tier1_actionable` filter pre-applied and scrolls to the projects list.

---

## Part D — Live Commercial Proof Pack

---

### Brett Hansen (userId: 2550006)

**Territory:** WA + NT | **Business Lines:** Portable Air, Pump (Flow), Dewatering Pumps

**isPumpLaneRep:** true

### Project 1 — Large-Scale Iron Ore Processing Development (ID: 690024)

- **Location:** Pilbara, WA
- **Stage:** Progressing following environmental approval
- **Pump Score:** 100
- **Explanation:** Explicitly states ‘dewatering’ as confirmed site activity; lists ‘dewatering pumps’ as equipment signal
- **Action Mode:** find\_site\_contact
- **Account Prior:** none
- **Contacts (2, rejectionReason IS NULL):**
  - ★ Lucas Chaffin | Mining Manager at UNKNOWN | trust: named\_unverified | no email
  - Dmitry Kharchenko | Game Designer (wrong person — LinkedIn contamination) | trust: named\_unverified | no email
- **Weakness:** Both contacts are weak. Lucas Chaffin has no email. Dmitry Kharchenko is clearly a wrong-company match. Enrichment needed.

### Project 2 — Kwinana Gas Power Generation 2 (ID: 660052)

- **Location:** Kwinana, WA
- **Stage:** FID taken, construction to start soon
- **Pump Score:** 100
- **Explanation:** Dewatering explicitly confirmed as site activity and equipment signal
- **Action Mode:** direct\_pursue
- **Account Prior:** none
- **Contacts (5, rejectionReason IS NULL):**
  - ★ Johan Myburgh | General Manager Construction | trust: send\_ready | email: jmyburgh@agl.com.au
  - Paul Holland | General Manager Procurement & Property | trust: send\_ready | email: pholland@agl.com.au
  - Norbert HOUNSINOU | Deputy Asset Maintenance Manager | trust: named\_unverified

- Robert Streager | Manager of Operations | trust: named\_unverified
- Andrew van Niekerk | Unit Engineering Manager | trust: named\_unverified
- **Assessment:** Strong. Construction contact (Johan Myburgh) now ranks above procurement contact (Paul Holland). Both are send\_ready. Direct pursue mode is correct for FID-stage project.

### Project 3 — Regional Road Upgrade (ID: 570009)

- **Location:** NT, NT
- **Stage:** Moving toward construction
- **Pump Score:** 100
- **Explanation:** Dewatering confirmed as site activity; dewatering pumps for excavations listed in equipment signals
- **Action Mode:** direct\_pursue
- **Account Prior:** NRW Civil & Mining (A — Direct Pursue, score 75)
- **Contacts (5, rejectionReason IS NULL):**
  - ★ Trevor Hopps | Operations Centre Systems Manager | trust: send\_ready | email: trevor.hopps@nt.gov.au
  - Collon Mullett | Senior Project Manager | trust: named\_unverified
  - Tarek Elsayed | Project Manager | trust: named\_unverified
  - Jigar P. | Workforce Operations Manager | trust: named\_unverified
  - Acciona Infrastructure P/L | Service Operations | trust: named\_unverified
- **Assessment:** Account prior match (NRW Civil & Mining, Priority A) is a genuine signal. Trevor Hopps is send\_ready. However, “Operations Centre Systems Manager” is an IT/systems role, not a site ops role — this is a title mismatch. The project manager contacts (Collon Mullett, Tarek Elsayed) are more relevant for pump outreach but are named\_unverified.

**Does Brett look like a WA pump rep?** Mostly yes. Two of three projects are genuine WA/NT dewatering opportunities with construction-stage signals. The Kwinana project (FID, direct\_pursue, send\_ready construction contact) is the strongest card. The Pilbara project has a contact data gap. The NT road project has an account prior match but the primary contact title is weak.

---

### Dan Day (userId: 3630009)

**Territory:** QLD, NSW, SA, VIC, TAS | **Business Lines:** Pump (Flow), Dewatering Pumps  
**isPumpLaneRep:** true

### Project 1 — Cairns Water Infrastructure Upgrade (ID: 720008)

- **Location:** Cairns, QLD
- **Stage:** Ongoing
- **Pump Score:** 100
- **Explanation:** Dewatering confirmed as site activity; pipeline installations require excavation dewatering
- **Action Mode:** find\_site\_contact
- **Account Prior:** none
- **Contacts:** 0 (rejectionReason IS NULL) — **enrichment needed**
- **Weakness:** No contacts at all. Cairns Regional Council is the implied owner but no contacts have been enriched for this project.

### Project 2 — Bass Strait Decommissioning Project (ID: 690073)

- **Location:** Bass Strait, VIC
- **Stage:** Approvals for bringing infrastructure ashore
- **Pump Score:** 100
- **Explanation:** Dewatering confirmed for onshore processing of decommissioned infrastructure
- **Action Mode:** find\_site\_contact
- **Account Prior:** none
- **Contacts (1, rejectionReason IS NULL):**
  - ★ Julie Chavez | General Manager @ Woodside Pizzeria | trust: named\_unverified | email: julie.chavez@woodside.com.au
- **Weakness:** “Woodside Pizzeria” in the title is a LinkedIn contamination — this is not a Woodside Energy contact. The single contact is unreliable.

### Project 3 — Port of Newcastle MPT Berth Extension (ID: 690059)

- **Location:** Mayfield, NSW
- **Stage:** Construction has begun
- **Pump Score:** 100
- **Explanation:** CONFIRMED SITE ACTIVITIES: dewatering; waterside construction requires water ingress management
- **Action Mode:** find\_site\_contact
- **Account Prior:** none

- **Contacts (5, rejectionReason IS NULL):**

- ★ Nathan Cambourn | Project Manager | trust: send\_ready | email: nathan.cambourn@portofnewcastle.com.au
- Parwinder Singh | Project Manager | trust: send\_ready | email: parwinder.singh@portofnewcastle.com.au
- Shane Ambrose | Project Manager | trust: send\_ready | email: shane.ambrose@portofnewcastle.com.au
- Gus Hutchison | Project Manager | trust: named\_unverified
- Brett Allan | General Manager | trust: named\_unverified

- **Assessment:** Three send\_ready project managers at Port of Newcastle. Construction has begun. This is the strongest Dan Day card. However, action mode is find\_site\_contact not direct\_pursue — this is because no account prior exists for Port of Newcastle. The project manager contacts are construction-side, which is correct for pump lane.

**Does Dan look like an east-coast pump rep?** Partially. The Port of Newcastle project is legitimate and has strong contacts. However, the top two projects (Cairns, Bass Strait) have contact data gaps — one has zero contacts, one has a contaminated contact. The quarantine of 15 fabricated contacts has removed the false confidence from these projects. Dan’s territory now shows the honest picture: good project scoring, but contact enrichment is needed for QLD and VIC projects.

---

## What Still Looks Weak

| Issue                                                                                            | Severity | Affected Rep |
|--------------------------------------------------------------------------------------------------|----------|--------------|
| Lucas Chaffin (Pilbara project) — Mining Manager with no email, company “UNKNOWN”                | High     | Brett        |
| Dmitry Kharchenko (Pilbara project) — Game Designer, clearly wrong person                        | High     | Brett        |
| Trevor Hopps (NT Road project) — “Operations Centre Systems Manager” is an IT role, not site ops | Medium   | Brett        |
| Cairns Water project — zero contacts after quarantine                                            | High     | Dan          |
| Bass Strait project — Julie Chavez has “Woodside Pizzeria” in title (LinkedIn contamination)     | High     | Dan          |
| All three Dan Day projects show find_site_contact action mode — no direct_pursue                 | Medium   | Dan          |
| No account priors matched for Dan Day’s top 3 projects                                           | Low      | Dan          |

### Recommended next actions:

1. Enrich Cairns Water Infrastructure Upgrade (project 720008) — Cairns Regional Council contacts via Apollo/Lusha
  2. Quarantine Dmitry Kharchenko (ID unknown) from Pilbara project — clearly wrong person
  3. Quarantine Julie Chavez from Bass Strait project — “Woodside Pizzeria” contamination
  4. Add Port of Newcastle to WA Targets (accountPriors) if Dan Day’s territory includes NSW infrastructure
- 

## Quarantine Filter Verification

---

The `rejectionReason IS NULL` filter is applied in three places:

1. `server/db.ts` → `getContactsForProject()` (line 235): `and(inArray(contacts.id, ids), isNull(contacts.rejectionReason))`
2. `server/db.ts` → `getAllContacts()` (line 533): `${contacts.rejectionReason} IS NULL` in SQL template
3. `server/contactSelector.ts` → `selectProjectContact()` (line 142): `const activeContacts = contacts.filter(c => !c.rejectionReason)`

All three layers independently exclude quarantined contacts. A contact with `rejectionReason` set will never appear in any rep-facing view.
