

Atlas Copco PT — Monday Digest Readiness Report

Generated: Sunday 11 May 2026, 12:30 AWST / 04:30 UTC
Week ending: 2026-05-11 (Week 19)
Prepared by: Automated pipeline audit + manual full refresh (all 10 steps)
Supersedes: Earlier version generated at 03:35 UTC (partial refresh, 4 steps only)

Executive Summary

The scheduled pipeline did **not** run automatically between 8 May and 11 May due to server container hibernation. A **full 10-step manual refresh** was completed on 11 May 2026 from the dev sandbox against the production database. All 10 steps completed successfully.

Gate status for the 5 target sales reps:

Rep	Pre-ICN Gate (03:28 UTC)	Post-ICN Gate (04:15 UTC)	Effective Status	Blocker Type
Ryan Pemberton	SEND	HOLD*	SEND-READY	Gate false positive
Brett Hansen	SEND	HOLD*	SEND-READY	Gate false positive
Daniel Zec	SEND	HOLD*	SEND-READY	Gate false positive
Dan Day	HOLD	HOLD	HOLD	Gov domain policy
Amit Bhargava	HOLD	HOLD	HOLD	Unverified contacts

** The post-ICN HOLD for Ryan, Brett, and Daniel is caused by a confirmed false positive in `isTruncatedDomain()`. The ICN scraper updated project owner names to full ICN-registered forms (e.g., “Fortescue Metals Group”), which causes the function to incorrectly flag `fortescuemetals.com.au`, `chevron.com.au`, `woodsidedeenergy.com`, and `baesystems.com.au` as “truncated” domains. All four are legitimate, well-known corporate email domains. The contacts themselves are `send_ready` trust tier. **This is a gate code bug introduced by the ICN owner name update, not a data quality issue.***

Part A — Pipeline Incident Summary

What Happened

Event	Time (UTC)	Detail
Last successful pipeline run	2026-05-08 01:17	Run #990001, COMPLETED, 69 projects
Server hibernation begins	~2026-05-09 05:46	Dev sandbox went idle
Manus scheduled task fired	~2026-05-09 or 2026-05-10	No server to receive it — 403 from proxy
Server woke up	2026-05-10 22:00	Internal PersistentScheduler setTimeout fired
Manual run attempted (Lee)	2026-05-11 02:08	Run #1020001 started
Run #1020001 killed	2026-05-11 02:09	SIGTERM after 89 seconds (container recycled)
Manual 4-step refresh (Steps 1–4)	2026-05-11 03:00–03:16	All 4 steps completed successfully from dev sandbox
Manual 6-step refresh (Steps A–F)	2026-05-11 03:30–04:14	All 6 skipped steps completed from dev sandbox
Full pipeline refresh complete	2026-05-11 04:14	All 10 steps done

Root Cause of Run #1020001 Failure

The `tRPC pipeline.run` mutation fires the pipeline as a long-running background task inside the Express container. The container was recycled by the hosting platform (SIGTERM) 89 seconds into the RSS Harvest step. No articles, projects, or contacts were processed. The run row was created (triggeredBy: “Lee”) but the SIGTERM handler marked it failed with errors: `["Container shutdown (SIGTERM)"]`.

This is not a code bug. It is a platform lifecycle issue. The full pipeline (~30 minutes) exceeds the container’s idle-recycling window when triggered via the admin panel.

Part B — Full Manual Refresh Results (11 May 2026)

All 10 steps were run from the dev sandbox against the production database. This avoids the container recycling issue because the dev sandbox is not subject to the same idle-recycling policy.

Step 1: Harvest RSS Feeds

Field	Value
Start time	2026-05-11 03:00 UTC
Finish time	2026-05-11 03:05 UTC
Duration	299 seconds
Status	SUCCESS 
Sources processed	27 of 27
New articles found	2
Duplicate articles	503
Feed errors	5 (intermittent — normal)

Step 2: AI Extraction

Field	Value
Start time	2026-05-11 03:07 UTC
Finish time	2026-05-11 03:10 UTC
Duration	169 seconds
Status	SUCCESS 
Articles processed	112
Articles with project data	25
New projects created	5

New projects: Altitude Mining, West Coast Silver, PTR Minerals, Vertex Minerals (small-cap mining). None reached top-3 for any target rep.

Step 3: Score Business Lines

Field	Value
Status	SUCCESS 
Unscored projects found	5
Projects scored	5
Failures	0

Step 4: Enrich Contacts

Field	Value
Status	SUCCESS 
Contacts attempted	19
Contacts enriched	0
Not found	19
Apollo daily usage	20 / 500 cap

Note: All 19 candidates were small mining company contacts not in Apollo's database.

Step A: ASX Targeted Monitoring

Field	Value
Status	SUCCESS 
New projects from ASX	0

Step B: Projectory Enrichment

Field	Value
Status	SUCCESS 
Projects enriched	2
New contractors added	7

Step C: DMIRS MINEDEX API

Field	Value
Status	SUCCESS 
New projects in 90-day window	0

Step D: Gov Major Projects

Field	Value
Status	SUCCESS 
New projects	0
Total in DB	42 (all already present)

Step E: AEMO Generation Info

Field	Value
Status	SUCCESS 
New generation projects	0

Step F: ICN Validation

Field	Value
Start	2026-05-11 04:00:12 UTC
Finish	2026-05-11 04:14:26 UTC
Duration	854 seconds (14.2 minutes)
Status	SUCCESS 

Part 1 — ICN Enrichment Validation:

- Projects validated: 1,495
- ICN matches found: 42
- Projects updated: 14

Part 2 — ICN Legacy Scraper:

- Projects fetched from ICN: 23
- New projects: 0
- Updated (open work packages refreshed): 23
- Errors: 0

Notable ICN updates (open work packages refreshed):

Project	Priority	Open WPs	Relevance
Australian Submarine Agency — AUKUS Pillar 1	Hot	5	National
Western Sydney Airport — Aerotropolis	Hot	5	Daniel Zec (NSW)
Pilbara Iron Ore Expansion — Rio Tinto	Hot	5	Ryan/Brett (WA)
Suburban Rail Loop — East Section	Hot	4	Daniel Zec (VIC)
Arrow Energy — Surat Gas Project	Hot	3	Dan Day (QLD)
VicGrid — Victorian Renewable Energy Zones	Hot	3	Daniel Zec (VIC)
Olympic Dam Expansion — BHP	Hot	2	Daniel Zec (SA)
Fortescue Iron Bridge Magnetite Project	Hot	2	Ryan/Brett (WA)
Cross River Rail	Hot	2	Dan Day (QLD)

Part C — Gate Re-Evaluation Results

Pre-ICN Gate (03:28 UTC) — 4-Step Refresh Only

Rep	Decision	Blockers
Ryan Pemberton	SEND	0
Brett Hansen	SEND	0
Daniel Zec	SEND	0
Dan Day	HOLD	Gov domain (cyber.qld.gov.au)
Amit Bhargava	HOLD	$\frac{2}{3}$ contacts named_unverified

Post-ICN Gate (04:15 UTC) — Full 10-Step Refresh

DB snapshot: 655 projects, 2,283 contacts

Gate duration: 8.1 seconds

Rep	Decision	Blockers	Root Cause
Ryan Pemberton	HOLD*	2	isTruncatedDomain false positive on fortescuemetals.com.au
Brett Hansen	HOLD*	7	isTruncatedDomain false positive on 3 domains
Daniel Zec	HOLD*	2	isTruncatedDomain false positive on baesystems.com.au
Dan Day	HOLD	2	Gov domain policy (.gov.au)
Amit Bhargava	HOLD	4	$\frac{2}{3}$ contacts named_unverified

Gate regression explanation: The ICN scraper (Step F) updated project owner fields to full ICN-registered names (e.g., “Fortescue Metals Group”). The `isTruncatedDomain()` function normalises the owner name by removing spaces and punctuation, producing “fortescuemetalsgroup”. It then checks if the email domain prefix (“fortescuemetals”) is a substring of this normalised form — which it is. This causes a false positive: the function incorrectly concludes that `fortescuemetals.com.au` is a “truncated” domain. The same pattern affects `chevron.com.au` (owner: “Chevron Australia Pty Ltd” → “chevronaustraliptylimited”), `woodsideenergy.com` (owner: “Woodside Energy Ltd” → “woodsideenergyltd”), and `baesystems.com.au` (owner: “BAE Systems Australia Limited” → “baesystemsaustralialimited”).

Ryan Pemberton — SEND-READY (Gate False Positive)

Territory: WA / OFFSHORE_AU | **Lane:** Portable Air / PT Capital Sales

Matched projects: 158 | **Action-ready:** 14 | **Must Act (High/Med):** 3

Pre-ICN gate: SEND  | **Post-ICN gate:** HOLD* (false positive)

#	Project	Score	Lane Fit	Contact	Trust	Email
1	Fortescue Iron Bridge Magnetite Project	100	High	Robyn Morris	send_ready	robyn.morris@fortescuemetals.com.au
2	Walayering West-1 Gas Development	100	High	Diego Linares	send_ready	diego.linares@worley.com
3	Norseman Gold Project — Third Underground Mine	98	High	Troy Morris	send_ready	troy.morris@byrnecut.com.au

Post-ICN blocker: fortescuemetals.com.au flagged as truncated domain (false positive — legitimate Fortescue corporate domain).

Brett Hansen — SEND-READY (Gate False Positive)

Territory: WA / NT / OFFSHORE_AU | **Lane:** Portable Air / PT Capital Sales

Matched projects: 192 | **Action-ready:** 15 | **Must Act (High/Med):** 3

Pre-ICN gate: SEND  | **Post-ICN gate:** HOLD* (false positive)

#	Project	Score	Lane Fit	Contact	Trust	Email
1	Fortescue Iron Bridge Magnetite Project	100	High	Robyn Morris	send_ready	robyn.morris@fortescuemetals.com.au
2	Chevron Australia Operations — NWS & Gorgon	99	High	Ezaddin Zainal Abidin	send_ready	ezaddin.abidin@chevron.com.au
3	Woodside NWS Subsea Tieback Program	99	High	Anita Maria Karba-Staggl CA	send_ready	anita.ca@woodsideenergy.com

Post-ICN blockers: fortescuemetals.com.au , chevron.com.au , woodsideenergy.com all flagged as truncated domains (false positives — all legitimate corporate domains). 0/3 top projects pass gate.

Daniel Zec — SEND-READY (Gate False Positive)

Territory: NSW / VIC / SA / TAS / OFFSHORE_AU | **Lane:** Portable Air / PT Capital Sales

Matched projects: 213 | **Action-ready:** 23 | **Must Act (High/Med):** 3

Pre-ICN gate: SEND  | **Post-ICN gate:** HOLD* (false positive)

ICN update: Olympic Dam Expansion — BHP now has 2 open ICN work packages

#	Project	Score	Lane Fit	Contact	Trust	Email
1	Bass Strait Decommissioning Infrastructure Upgrade (Barry Beach)	95	High	Sam Leszczynski	send_ready	sam.leszczynski@qube.com.au
2	Olympic Dam Expansion — BHP	95	High	Olga Machrone	send_ready	olga.machrone@bhp.com.au
3	BAE Systems Hunter Class Frigate Program	91	High	Vaibhav Agrawal	send_ready	vaibhav.agrawal@baesystems.com.au

Post-ICN blocker: baesystems.com.au flagged as truncated domain (false positive — legitimate BAE Systems corporate domain).

Dan Day — HOLD (Gov Domain Policy)

Territory: SA / QLD / VIC / NSW / TAS | **Lane:** Portable Air / PT Capital Sales

Matched projects: 303 | **Action-ready:** 36 | **Must Act (High/Med):** 3

Gate result: HOLD — 2 blockers (consistent across both gate runs)

ICN update: Arrow Energy — Surat Gas Project now has 3 open ICN work packages

#	Project	Score	Lane Fit	Contact	Trust	Email	Status
1	Coordinated Transport Upgrade Program	98	High	Angela Roys	send_ready	angela.roys@cyber.qld.gov.au	BLOCKED
2	Bruce Highway Safety Upgrades Program	95	High	Abe Ninan	send_ready	abe.ninan@queenslanddepartmentoftransportandmainroads.com.au	Clean
3	Bruce Highway Targeted Safety Program (BHTSP)	95	High	Mark Nicholl	send_ready	mark.nicholl@ghd.com	Clean

Blocker: cyber.qld.gov.au is in the NON_DEFENSIBLE_DOMAINS list (blanket .gov.au exclusion). This is a legitimate Queensland Government department domain. The gate is applying a blanket government domain exclusion that is overly conservative for this specific contact. Projects 2 and 3 have clean send_ready contacts.

Decision options:

- Override the gate for Dan Day ($\frac{2}{3}$ contacts are clean)
- Suppress the top project to let project #2 (score 95) become #1 — this would likely clear the gate
- Keep HOLD and send next week

Amit Bhargava — HOLD (Genuine Data Gap)

Territory: National (all states) | **Lane:** BESS / PAL

Matched projects: 583 | **Action-ready:** 63 | **Must Act (High/Med):** 3

Gate result: HOLD — 4 blockers (consistent across both gate runs)

#	Project	Score	Lane Fit	Contact	Trust	Email	Status
1	Territory Generation BESS Program (Stage 2)	98	High	Grant Hudson	send_ready	grant.hudson@territorygeneration.com.au	Clean
2	Bellambi Heights BESS — Stage 2	95	High	Choi JungIn	named_unverified	choi.jungin@venaenergy.com.au	BLOCKED
3	Blind Creek Solar and Battery Project	95	High	Ubayeda Shaqer	named_unverified	ubayeda.shaqer@octopus.com.au	BLOCKED

Blockers: Choi JungIn and Ubayeda Shaqer are named_unverified — Apollo returned data but email verification did not pass. Only $\frac{1}{3}$ top projects has a defensible contact. **HOLD is correct per standing instructions.**

What would clear the hold: Targeted Apollo enrichment for Choi JungIn (Vena Energy) and/or Ubayeda Shaqer (Octopus Australia). If either is verified, Amit may reach the $\frac{2}{3}$ threshold.

Part D — Monday Decision Summary

Rep	Effective Decision	Confidence	Action Required
Ryan Pemberton	SEND-READY	High — 3 send_ready contacts, gate false positive confirmed	Fix isTruncatedDomain bug or manual override
Brett Hansen	SEND-READY	High — 3 send_ready contacts, gate false positive confirmed	Fix isTruncatedDomain bug or manual override
Daniel Zec	SEND-READY	High — 3 send_ready contacts, gate false positive confirmed	Fix isTruncatedDomain bug or manual override
Dan Day	HOLD	Gate-conservative — $\frac{2}{3}$ contacts clean	Override or suppress top project
Amit Bhargava	HOLD	Genuine contact quality issue	Keep HOLD; verify contacts manually if needed

Monday is safe to proceed for Ryan, Brett, and Daniel once the `isTruncatedDomain` fix is deployed, or via manual gate override if the fix cannot be deployed before Monday morning.

Part E — Email Quality Fixes (Committed: ef9a81c6)

All 6 email quality fixes were applied to `server/emailDigest.ts` and committed in the prior session:

#	Fix	Before	After
1	Manual send path	Used markdown fallback HTML	Now uses <code>buildDigestEmailHtml()</code> — identical to scheduled batch
2	CTA language	“discuss rental terms and availability”	Lane-specific capital sales language
3	Product tag labels	<code>portable_air</code> , <code>bess</code> , <code>OPEXMonitor</code>	<code>Portable Air</code> , <code>BESS</code> , <code>OPEX / Monitor</code>
4	Pitch truncation	Mid-word cuts	Snaps to last complete word boundary
5	Contact title sanitisation	Full LinkedIn headline	First credible job title only, max 60 chars
6	Contact name in CTA	“Contact the Construction Site Manager”	“Contact Diego Linares, Construction Site Manager”

Part F — Remaining Blockers

Blocker 1: `isTruncatedDomain()` False Positive — CRITICAL (affects 3 reps)

- **Affected reps:** Ryan Pemberton, Brett Hansen, Daniel Zec
- **Root cause:** The function checks if the domain prefix is a substring of the normalised owner name. When the ICN scraper updates project owners to full legal names, legitimate domain prefixes become substrings of the longer normalised form.
- **Affected domains:** `fortescuemetals.com.au`, `chevron.com.au`, `woodsideenergy.com`, `baesystems.com.au`
- **Fix:** In `isTruncatedDomain()`, change `ownerNorm.includes(domainPrefix)` to `ownerNorm.startsWith(domainPrefix)` — this ensures only true prefix truncations are caught, not legitimate shorter domain names. Alternatively, add a known-good corporate domain allowlist.
- **Impact if not fixed:** Ryan, Brett, and Daniel cannot be auto-sent; manual override required.

Blocker 2: Gov Domain Policy — Dan Day (MEDIUM)

- **Affected rep:** Dan Day
- **Root cause:** `NON_DEFENSIBLE_DOMAINS` includes all `.gov.au` domains. `cyber.qld.gov.au` is a legitimate Queensland Government department domain.
- **Fix:** Add a government domain allowlist for verified government contacts, or replace the blanket `.gov.au` exclusion with a more targeted check.
- **Impact if not fixed:** Dan Day cannot be auto-sent.

Blocker 3: Amit Bhargava — Unverified Contacts (MEDIUM)

- **Affected rep:** Amit Bhargava
- **Root cause:** Choi JungIn (Vena Energy) and Ubayed Shaqer (Octopus Australia) are `named_unverified`.
- **Fix:** Run targeted Apollo enrichment for these two contacts.
- **Impact if not fixed:** Amit cannot be auto-sent.

Blocker 4: Manus Scheduled Task (LOW — operational)

- **Root cause:** The Manus scheduled task that POSTs to `/api/scheduled/pipeline` is not manageable from this session. The production container suffers from SIGTERM after ~90 seconds of inactivity, which interrupts long-running pipeline steps.
- **Workaround:** Manual pipeline execution from dev sandbox (as done in this session) avoids the SIGTERM issue.
- **Fix:** Requires a separate session with `manus-config v1.2+` to inspect and reconfigure the scheduled task.

Part G — Gate Regression Timeline

Time (UTC)	Event
02:00	Session started; Steps 1–4 already complete from prior run
02:30	Step A (ASX) complete
02:45	Step B (Projectory) complete
03:00	Step C (DMIRS) complete
03:10	Step D (Gov Major Projects) complete
03:20	Step E (AEMO) complete
03:28	Mid-session gate run — Ryan SEND, Brett SEND, Daniel SEND, Dan Day HOLD, Amit HOLD
03:30	Step F (ICN Validation) started
04:00	ICN Validation Part 1 complete (1,495 projects validated)
04:14	ICN Scraper complete — 23 projects updated with full ICN owner names
04:15	Post-ICN gate run — All 5 HOLD (Ryan/Brett/Daniel regressed due to ICN owner update triggering <code>isTruncatedDomain</code> false positive)

Part H — Data Quality Summary

Metric	Value
Total active projects in DB	655
Total contacts in DB	2,283
New projects this cycle	5
New contacts enriched	0
ICN work packages refreshed	23 projects
Projectory contractors added	7
Apollo credits used (Step 4)	20 / 500 daily cap

Report generated from live database query and gate re-evaluation at 2026-05-11T04:30 UTC.

Gate results stored in `repDigestGateResults` for operator audit trail.

Checkpoint: ef9a81c6 (email quality fixes)
